Profile

I'm interested in sciences and its applications in business. I have been able to test my knowledge of scrum organization by working and leading team members on projects.

The understanding of customer needs, story splitting, solutions assessment and the implementation with the customers allowed me to have a "end-to-end" vision on projects.

Work experience

Cover group - Tournai
2008 - maintenant

Parametrization (Technical setting development) : Implementation of technical solutions of frames, gates, verandas and curtain walls in the software "Cover".
Training given to companies (Cover users and technical encoders). Working in the design office of companies, ensuring the deployment of the solution.

Managing of a new technical encoders team abroad

Setting up Computer Aided Production Management (GPAO) in companies, in the midst of production concerns.

Leading of projects though AGILE method - Scrum Master role.
As Product Owner, analysis of costumer needs, breaking down into stories, writing of specifications documents, risking Assessment, quality monitoring, planning and procedures.

Veranda Styling - Ternat
2005 - 2007

Introduction to the Aluminium and PVC constructions (windows and roofs).
Starting a conservatories/windows production workshop in Poland.

Feasibility studies from project received from customers and resellers. Preparing the documents for production (plans, technical specificities) according to the construction project and its environment. Planning, communication with the manufacturing workshop.
